# DIGITAL IMAGING FOR LIBRARIES AND ARCHIVES

BY ANNE R. KENNEY AND STEPHEN CHAPMAN

This guide will prove useful to all staff involved in the use of digital imaging technology, but is primarily intended for librarians and archivists who are contemplating or initiating programs to respectively convert the full contents of research materials to digital form. Issues addressed range from selection (and reselection) to conversion, to creating access versions on-screen and in-print, and to ensuring long-term viability.

# DISASTER PLANNING AND RECOVERY

## A How-to-Do-It Manual for Librarians and Archivists

BY JUDITH FORTSON

Disasters such as fires, floods, and earthquakes can devastate archival and library collections. *Disaster Planning and Recovery* helps archives and libraries to prepare for and survive the worst. The 181-page manual covers the various types of disasters—fire, water, wind, earthquakes—and how to recover from them when dealing with such media as paper, books, photographs, microfilm, and tapes. It also discusses the problems associated with structural damage. Several sample disaster plans are included, as well as the addresses of suppliers, national organizations, treatment centers, and publications.

# The American Archivist

## EDITORIAL POLICY

The *American Archivist* is the quarterly journal of the Society of American Archivists. It seeks to reflect thinking about theoretical and practical developments in the archival profession, particularly in North America; about the relationships between archivists and the creators and users of archives; and about cultural, social, legal, and technological developments that affect the nature of recorded information and the need to create and maintain it.

The *American Archivist* is a refereed journal. Each submission will be reviewed by experts in the subject matter of the submission and a final decision for publication will be based on this review.

### Journal Format

The *American Archivist* features a variety of types and lengths of articles. Except for book reviews, all inquiries and submissions should be directed to Philip B. Eppard, Editor, the *American Archivist*, State University of New York at Albany, School of Information Science & Policy, 135 Western Ave./113 Draper, Albany, NY 12222. Telephone: (518) 442-5128. Fax: (518) 442-5367. E-mail: pbe40@cnsibm.albany.edu.

**Research Articles** are analytical and critical expositions based on original investigation or on systematic review of literature. A wide variety of subjects are encouraged.

**Case Studies** are analytical reports of projects or activities that take place in a specific setting and offer the basis for emulation or comparison in other settings.

**Perspectives** are commentaries, reflective or opinion pieces, addressing issues or practices that concern archivists and their constituents.

**International Scene** pieces may include elements of any of the above formats in covering archival developments outside the United States.

**Professional Resources** can be annotated bibliographies, other items designed for practical use within the profession, or essays that review the developments (as opposed to the literature) in specified areas in a way that describes particular initiatives and places them in the context of broader trends.

The **Reviews** department evaluates books and other archival literature as well as the tools and products of archival activity such as finding aids, microfilm editions, audiovisual materials, exhibits, and computer software. On occasion it includes review essays to permit comparative analysis of related publications. Reviewers are selected by the Reviews editor. Direct inquiries to Barbara Craig, Faculty of Library and Information Science, University of Toronto, 140 St. George Street, Toronto, Ontario, M5S 3G6 Canada. Telephone: (416) 978-7093. Fax: (416) 971-1399. E-mail: craig@flis.utoronto.ca.

The **Forum** contains letters to the editor commenting on recently published articles or other topics of interest to the profession.

### Manuscript Submission Requirements

Manuscripts should be typed in English on white paper 8½-by-11 inches in size. Computer-printed documents are preferred to be in near-letter-quality mode. Both text (including lengthy block quotations) and endnotes should be double-spaced following the text, not at the foot of each page. All pages should be numbered. The author's name and address should appear only on the title page, which should be separate from the main text of the manuscript. The preferred maximum length is 8,000 words for research articles and surveys and 3,000 words for case studies and perspectives, but these length requirements can be waived for certain articles in consultation with the editor. All articles should be accompanied by a 100-word abstract and author's biographical statement.

Four copies of the manuscript should be submitted for research articles, and two copies for all other types of articles. Illustrations are welcome in all departments. Only photocopies of photographs need be included with the initial submission of an article. Glossy 8-by-10 inch originals will be required when and if the article is accepted for publication.

Editors of the *American Archivist* use the *Chicago Manual of Style*, 14th edition (University of Chicago, 1993), as the standard of style and endnote format, and *Webster's Third New International Dictionary of the English Language*, (Merriam-Webster Inc., 1995) for spelling. Terms having special meanings for members of the profession should conform to the definitions in Lewis J. and Lynn Lady Bellardo, comps., *A Glossary for Archivists, Manuscript Curators, and Records Managers* (Chicago: Society of American Archivists, 1992). Authors' variations from these standards should be minimal and purposeful.

It is expected upon acceptance that authors will provide copies of their manuscript on diskette. At this time, it is preferred to receive manuscripts composed in Microsoft Word 6.0, but the editor can accommodate any other word processing software.

The *American Archivist* will not consider a manuscript that is being reviewed by another journal at the same time, nor will it normally consider an article that has been published previously in a similar form. A separate reprinting policy has been prepared, but normally reprinting will be initiated by the editor.

The author is responsible for understanding and following the principles that govern the "fair use" of quotations and illustrations and for obtaining written permission to publish, where necessary. Accuracy in endnote citations is also the author's responsibility, although the editors may occasionally confirm the accuracy of selected citations. Authors are required to assign copyright of their work to the journal but can expect to receive permission for subsequent use of their own work without restriction.

### Review and Production Procedures

Manuscripts are sent out (without the author's name) for peer review by two readers who evaluate them and recommend acceptance, rejection, or revision. Author notification of a final decision normally takes a minimum of eight to ten weeks. Acceptance for publication is usually on the condition that specified revisions be made. If an article is accepted, the author will be requested to prepare a brief biographical sketch to accompany the published article. Authors are given the opportunity to approve all editorial changes and to review page proofs for correction of printers' errors. The minimum editorial and production cycle—which includes receipt of a manuscript, review, acceptance, revision, page makeup, printing and distribution—is approximately twelve months; various factors can affect that time period.

Authors will receive three complimentary copies of the journal in which their articles appear; reviewers receive two tear-sheets. Reprints/offprints may be ordered at the time page proofs are sent to the author for review.

**Additional Inquiries**

Address additional inquiries about the *American Archivist* to: Teresa Brinati, Managing Editor, Society of American Archivists, 600 S. Federal, Suite 504, Chicago, IL 60605. Telephone: (312) 922-0140. Fax (312) 347-1452. E-mail: [tbrinati@archivists.org](mailto:tbrinati@archivists.org).

*“If we are successful as archivists, the historical record will speak for this past in a full and truthful voice. And, as a society, we will be wiser for understanding who and where we have been.”*

## Annual Index

### Volume 58 (1995)

DEBORAH S. SCHMITT, CYNTHIA K. SAUER, COMPILERS

The annual index to the *American Archivist* includes authors and titles of articles; authors, titles, and reviewers of items in the "Reviews" section; letters to the editor; editors' columns; presidential addresses and reports of the Society of American Archivists; obituaries; and recipients of awards listed in the journal. Items with multiple authors are listed fully only under the first author. Finding aids listed in the "Reviews" section appear under the entry "Guides (individual titles)"; fully-reviewed finding aids are further indexed by author(s) and title. Those listed in the "Selected Recent Publications" section appear only under the "Guides" entry. Other items from "Selected Recent Publications" are not included in the index.

Winter (58:1) pp. 1–116  
 Spring (58:2) pp. 117–234  
 Summer (58:3) pp. 235–376  
 Fall (58:4) pp. 377–497
